

## CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listings, of claims in the application:

- Do not enter 17107 CWA
1. (Currently Amended) A self-contained substance application system, comprising:
    - a support member at least partially defining a first cavity and a second cavity;
    - a first substance located in the first cavity;
    - a second substance located in the second cavity;
    - a first burstable membrane enclosing the first cavity, the first burstable membrane configured to break apart due to an increase in internal pressure;
    - a second burstable membrane enclosing the second cavity;
    - an applicator attached to the support member; and
    - an indicator identifying a location of the first cavity.
  2. (Original) The system of Claim 1, further comprising first and second support member portions each having an open end and a closed end, the first and second support member portions affixed to one another at their respective closed ends to at least partially define the support member.
  3. (Original) The system of Claim 1, further comprising a crimp in the support member that at least partially isolates the first cavity from the second cavity.
  4. (Original) The system of Claim 1, wherein the first cavity is isolated from the second cavity and the first cavity defines a volume larger than a second cavity defined volume.
  5. (Original) The system of Claim 1, wherein the support member has a substantially linear configuration and a substantially circular cross section.
